## Rental Details

The Villa Footprints is a property of genuine architectural ambition — a multi-building beachfront estate on Grace Bay that achieves something rare: grand scale without any loss of intimacy. Designed around a central courtyard of palms and still water, the composition draws the eye inward before opening it outward again, to the ocean views that are framed from every bedroom on the property. At 13,109 square feet across 1.4 acres, with 213 feet of private Grace Bay frontage, the proportions here are exceptional — yet the experience of the house is one of calm and enclosure rather than ostentation.
